

Enabling Protected View-MSOffice

ENABLING PROTECTED VIEW

Cause:

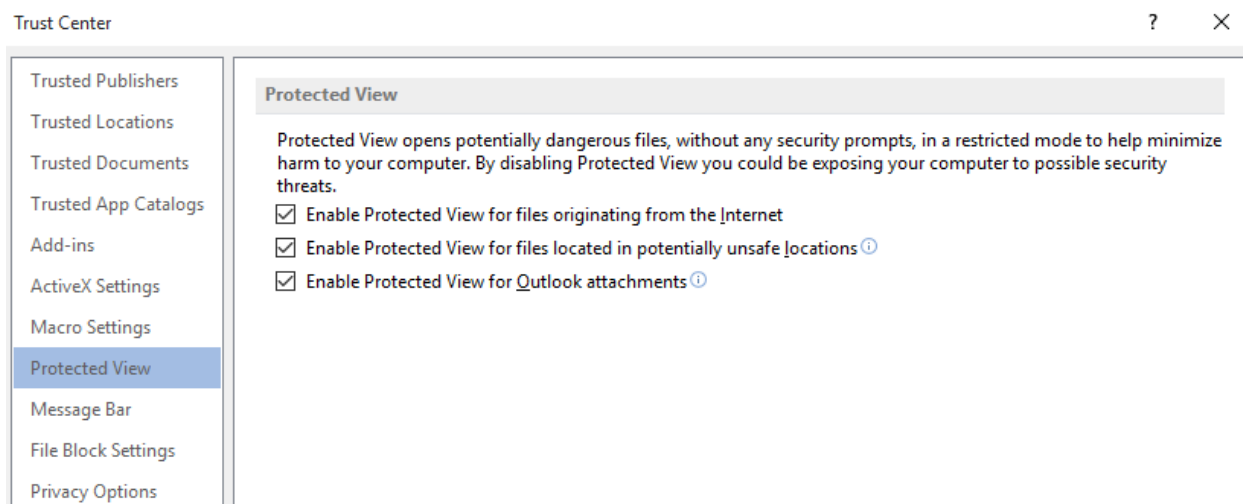

Receiving an email in outlook with a protected view attachment, no matter what the program-Excel, Powerpoint, Word, One Note etc...

Resolution/Things to Check:

In each respective office program go to:

File->Options->Trust Center->Trust Center Settings->Protected View->

Then check all the boxes to enable protected view:

Once selected Click "OK", then close out of the Trust Center Settings, and emails received should now be able to have attachments without the document being locked.
